3D Feature Film
Teaser
"Death
Defier"

The team at **Everyman Entertainment** in partnership with High Def Video Services and with the support of Panavision and Fuel VFX have just completed shooting a 3D teaser for their upcoming feature film "Death Defier". The supernatural thriller to be shot entirely in Australia is the first in a slate of projects written and directed by Shane Cam with producers Michael Cam, David Jowsey and Lucy Markovich.

Having wrapped on James Cameron's 3D feature film "Sanctum," award winning DOP Jules O'Loughlin shot the "Death Defier" teaser using Panavision's new Element Technica 3D rig mounted with the MX Red One Digital Cinema Cameras and Angenieux Zooms.

Everyman Entertainment and Hi Def Video Services will be relocating to Leichhardt where they are establishing a 3D capable facility with digital cinema services including a 3D projection theatre.

"The Death Defier teaser shoot went very smoothly considering the complications associated with your typical 3D shoot. Using the Element Technica Quasar 3D rig, two MX Red One Cameras and with the support of Panavision's Andrew Collier, Peter Lorz and Grant Hansford, the shoot was a great success. The stereo pictures we were able to capture were really impressive and I cannot fault the Quasar rig nor the knowledge and support that we received from Panavision," said Jules O'Loughlin.
